FVG branch

# Projects in Bloom

- teaching PM to primary school (5-10) children
- based on a “**kit**” (a [*very*] simplified version of the PMBOK)
- kit has already been translated in 14 languages
- Promote the 4C (Creative, Collaborate, Connect, Critic thinking)
- The format includes:
  - *tutor* is the role appointed to teacher relationships
  - tutors teach teachers and teachers teach children
  - final event with award ceremony

# th 5 edition - 2016

- attending 10 classes
- ~ 200 children involved
- ~ 20 teachers involved
- ~ 350 participants to the final event in Gorizia
- experience and format exported in Regione Veneto

# My experience as a tutor

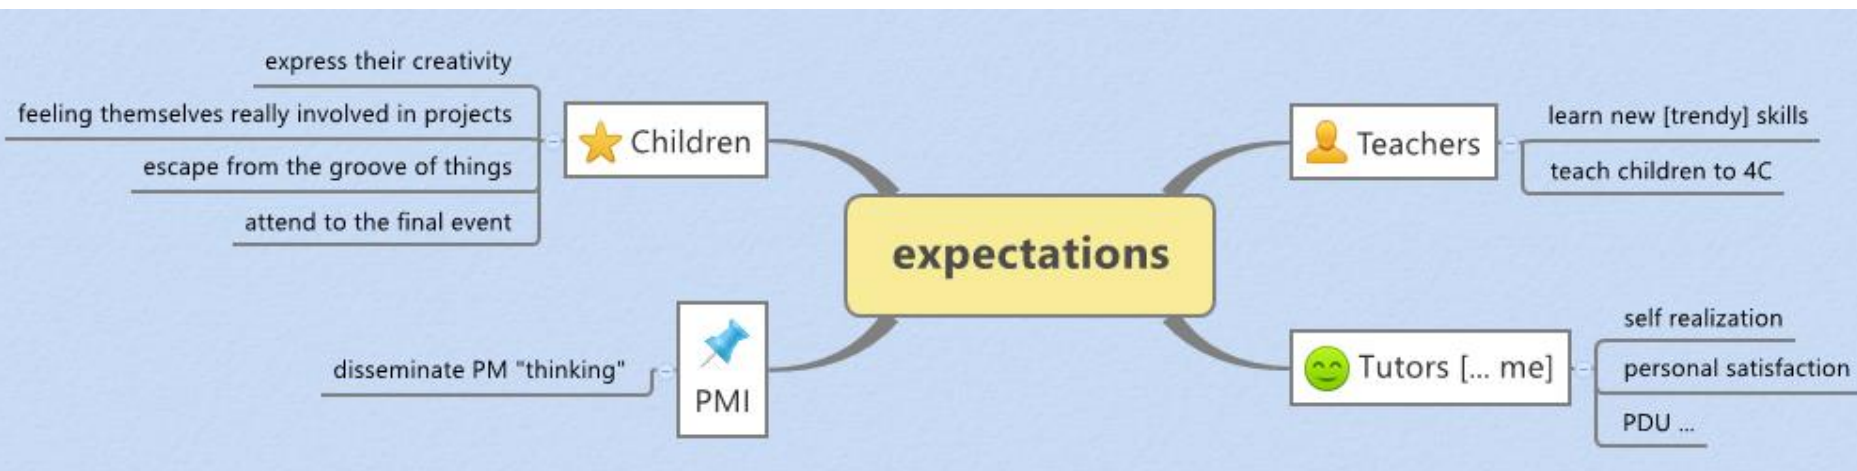

- never entered in contact with primary school before
- worked for four years in PiB
- worked as a tutor with 3 (2014), 5 (2015) and 6 (2016) classes in Trieste
- very different projects:
  - build a small theater
  - showcase and model of the food pyramid
  - organize a Trieste monument excursion for their parents
  - grandparents entertainment at the hospice
  - a book regarding water importance
  - flea's market for parents

# Key Success Factors [*in my opinion*]

- **teachers** play a **key role**, so motivate them:
  - involving the school manager
  - using soft skills
  - finding and talking to the right persons
- managing **THEIR** projects with PMI techniques
- follow teachers **step by step** (some steps are harder than the others)
- moreover:
  - provide all the materials (paper, post-it, etc.)
  - giving to teachers enough relevance during the event and on the press

- TIPS FOR A GREAT PRESENTATION
  1. Choose an original and engaging topic related to project management that you are passionate about.
  2. Speak about concepts & ideas, experience or your **personal** point of view. Do not speak about your company, product or service.
  3. Choose your images wisely. If possible, create your images in landscape orientation to maximize the use of the screen.
  4. Reference your images! If they are your own
